# Table - User Manual

# Introduction

*Table* is a plugin for Rhino 3D, designed to add the possibility to create, import, or edit spreadsheets in your Rhino document.

# **Plugin installation**

# Overview

The plugin installer can be downloaded at: https://www.tomkod.com/product/tables/ A free trial is included, and yearly licenses can be purchased on the aforementioned page. *Table* works either for Rhino 5<sup>1</sup>, Rhino 6<sup>2</sup>, and Rhino7<sup>3</sup>, but some features are not included in the Rhino 5 version.

## Yak

Our plugins are also compatible with <u>Yak</u>, Rhino's new package manager <sup>4)</sup>, which is basically an application store for Rhino. You just need to call Rhino's command **\_PackageManager**:

You can also install from the repository with the following command line:

"D:\Program Files\Rhino 6\System\Yak.exe" install 'PluginName'

If you add this in a batch file (\*.bat) at windows startup, it is probably the best way to keep all your plugins up-to-date <sup>3</sup>

C:\WINDOWS\system32\cmd.exe X C:\>"C:\Program Files\Rhino 6\System\Yak.exe" install PluginName Downloading PluginName (X.X.X)... Downloaded PluginName (X.X.X.) Installing PluginName(X.X.X)... Successfully installed PluginName(X.X.X) :\>

### License activation

#### Prerequisites

The free evaluation can be used once per computer, and requires network access to www.license.tomkod.com The license activation requires network access to www.tomkod.com

Please check your firewall in case of failure.

### Activation form

The activation window automatically shows up when the plugin is loading and a valid license or trial is not registered. If you want to see, change or remove your license while the plugin is already loaded, you can use the Rhino commands **PluginName\_License**.

Activation status is always visible on the upper right corner of the form, if the icon is green your plugin will be enabled:

$\checkmark$

#### **Trial Tab**

This first tab is dedicated to the trial requests. Your trial status is displayed, and the button is disabled if a trial is not available for your computer (Your trial has already been activated, or the server is unreachable)

TomKod license activation - Ta	able 3.x	?	×
TomKod >>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>	Plugin Status Enabled - license is valid	0	)
Free Trial License Commercial License Computer ID:	cense Details		
Reg	uest Free evaluation (*)		
	21/12/2020		
Status: Accepted (End da	ne. 21/12/2020)		

#### **Commercial Tab**

This tab's two main buttons let you Check-out (Activate) or Check-in (Desactivate) your license from

our license server.

TomKod licens	e activation - Table	e 3.x		?	×
FomKod Softwares for use		Plugin Status Enabled - lic	ense is valid	0	
Free Trial License	Commercial Licens	e Details			
Email		ma .com			
Product key		-			
Activ	rate (Check-Out)		Desactivate (C	heck-in)	Ì
Status: Dis	abled				ï
Enable floa	ating licenses ( Affe	cts every Ton	nKod plugins )		
Use a license ce	ertificate				
	native method for of void network activa				
8303555555					

When the checkbox "Enable floating licenses" is checked, every TomKod's plugin will try to deactivate the license automatically when closing (Making it available for another of your computers)

Finally, a license certificate (\*.TkLic) can be selected at the bottom of this tab. It allows to activate a license offline, but the license won't be floating anymore. If you need one, contact us at https://www.tomkod.com/contact/

### Toolbar

The toolbars for Rhino are always included in your plugins installation directory, or can be downloaded here.

You just have to drag/drop the file "Tomkod.rui" to a rhino window to install them.

# **Features and commands**

## Table\_About

This command can be used only from the command line prompt. It displays the plugin's current revision and license status.

# Table\_License

This command can be used only from the command line prompt. It displays the plugin's activation form.

See license\_activation.

### TableCreate

### Walkthrough

The command **TableCreate** allows creating a new table directly from Rhino. At first, it will show a basic spreadsheet editor:

This					
	is		-		
		A			
			Test		
1	2	3	4	5	

Afterward, the user will be able to pick the Table's insertion point, with a real-time preview. <sup>5)</sup>

Thie		title		
11115		-		-
	IS			
		A	1	
		10000	Test	
1	2	3	4	5

### Options

TableLocation ( FontHeight= 10 Corner=UpperLeft TitleRow=None Font ):

Name	Description			
FontHeigh	nt Sets the text heig	Jht		
Corner		should be used as snap point. es are: UpperLeft, UpperRight, LowerLeft, LowerRight		
	None	No title row will be added		
TitleRow	Above A title row will be added above the table content			
	Below	A title row will be added below the table content		
Font	TableImport Please select a font AcadEref AIGDT AmdtSymbols AMGDT AmidEnne Arial Arial Black Amprior Bahnschrift Bahnschrift			
	ОК	Pops up a dialog to let the user select the required font family.		

### TableEdit

The command **TableEdit**<sup>6)</sup> allows us to edit a table created or imported with our plugin. It works the same as the command TableCreate, except that the user will be asked to select an existing table to edit.

The same spreadsheet editor and options are available.

### TableImport

### Walkthrough

The command **TableImport** allows to import a spreadsheet from an Excel file (.xls, .xlsx) or from a csv file (.csv). After launching the command, a dialog offers to select a compatible file:

Organiser * Nou	veau d	lossier			10			1
Accès rapide	^	Nom	Modifié le	Type		Tailfe		
Bureau #		iest.xisx	2020-05-29 09:56	Feuil	e de calcul Micr		9 Ko	
THE PARAMETER IN	8							

If the excel file has several worksheets, the user will be asked to pick one among the list:

Sheet1		
Sheet2		

### Scripted mode

This command can be scripted using RhinoScript or your own macros:

Command: -TableImport Information: In scripted mode, your csv file must use ";" as separator. Enter a file path to import (\*.csv, \*.xls, \*.xlsx):

### Options

TableLocation ( FontHeight= 10 Corner=UpperLeft TitleRow=None Font ):

Name	Description	
FontHeight	Sets the text he	eight
Corner		le should be used as snap point. alues are: UpperLeft, UpperRight, LowerLeft, LowerRight
	None	No title row will be added
TitleRow	Above	A title row will be added above the table content
	Below	A title row will be added below the table content

Name	Description	
	Tableimport ×	
	Please select a font	
Font	AcadEref AIGDT AmdtSymbols AMGDT Amienne Arial Anial Black Amprior Bahnschrift Behnschrift Condensed	
	OK Cancel Por	s up a dialog to let the user select the required
	font family.

## TablesReload

This command will reload every tables in the document from their original document (.xls, .xlsx, .csv). The tables whose original file has been deleted or moved will be ignored, as well as tables created inside Rhino.

## **TablesDuplicate**

This command will create a new table, based on an existing one.

1) Rhino5.12 or later 2) Rhino6.15 or later 3) Tested up to Rhino 7.1 4) Rhino 6 or later only, with graphic user interface for Rhino7 only 5) In rhino5, the preview might not display the texts with the selected font 6) Only available with Rhino 6 7) Excel tab
